Custom Paint Matching

We can match our paint to your colour of choice

Paint Circuit Auto Body Supply Ltd knows that when you need touch-up paint, it must match the colour and gloss of your original finish exactly. Our highly trained color match department guarantees the most precise and accurate match to your provided color standard or paint color sample.

Send us your colour sample in the form of a colour panel or an actual part of your product or equipment. You may also choose your colour from a Pantone color card deck. In about a week or less, you will be sent a preproduction sample for your approval.

Each colour match is assigned a formula number that is stored in our customer database. With this stored information, future orders can be processed immediately without delay.

Aerosol Spray

The importance of a proper paint finish and color match goes without saying. We can customize the aerosol spray paint to any colour you like.

Informative Aerosol Spray Paint Facts:
