Here is our Suppliers Listing of manufacturers and products that we sell  
Can't find what you are looking for? JUST CONTACT US!

First let's define the difference between body work and paint work so you'll know where to look on this list for information, tools and materials that can help you with the area of your project that needs help at this time.

Body work ends when you have removed the dents, filled the surface irregularities with bondo or whatever and are just about ready to apply primer

Paint work begins when you pick up your sander or sandpaper to begin feathering the paint for primer

Paints and Finishes considers the importance of a proper paint, finish and colour match. What's the first thing a customer sees when they first look at their vehicle? The colour.
